Overview and Outcomes

Grades are one way to provide feedback to students to give them a sense of how they are progressing achieving the learning outcomes of a program of study. Grades are the primary way we measure student success. To this end, it is important to provide students with up to date grade information so they can plan their studies accordingly.

Learn@Seneca includes a robust Grade Centre, which can provide students with a breakdown of how they will be evaluated in a course, provide detailed information about their progress in a course, and provide faculty with a way to track grades and calculate final marks.

Please note: Grade Centre is the only college-approved method to share assessment marks with students. Tools such as OneDrive should not be used to store private student information.

By the end of this module, participants will be able to

1. Set up the Grade Centre to display all individual assessments and corresponding grades to students in a course;
2. Use the Grade Centre to calculate final grades for a course.
