

Micro-credentials at Seneca

Published 10/27/2020 by [Anh Lam](#)

A micro-credential is a recognition of learning awarded for the achievement of a small set of specific competencies. Micro-credentials are issued by academic institutions, corporations, and other training organizations in the form of digital badges.

A digital badge is a visual emblem that accompanies a micro-credential. Metadata embedded within the badge identifies the issuing institution and details the competencies and evidence required to earn the badge.

Micro-credentials for Students

Seneca is proud to be starting down this alternative way of acknowledging what students have learned. We have developed , a system of delivering micro-credentials and of allowing the earner to claim the micro-credential as a recognition of skill acquisition.

Micro-credentials for Faculty

As part of Seneca's Digital Learning Strategy, the Teaching & Learning Centre is pleased to offer [Professional Development Micro-credentials for Faculty](#) in support of professional development accomplishments.

Micro-credentials can be earned for completion of Teaching & Learning Centre courses, online modules, conferences, and workshops. The list of [Current Teaching and Learning Micro-credentials](#) is available.
