

# H5P

Version 3

Published 2/9/2021 by [Ashley Ribbel](#) Last updated 2/10/2021 3:53 PM by [Ashley Ribbel](#)

## About

H5P is short for HTML5 Package. It's a free, open source framework and is financially supported by Mozilla. H5P gives you the ability to create interactive learning content to embed in Blackboard, in an online book in Pressbooks, or on any web page. You can use H5P to enhance many type of learning experiences, for example:

- A form wizard that helps students plan out every step of their project
- An interactive video to encourage engagement during viewing
- Self-directed quizzes
- Image hotspots to explore a graphic more thoroughly
- Interactive presentations that include self-assessment and opportunities to reflect
- and many, many more

## License

We have access to H5P through the [eCampusOntario Studio](#). Sign up for a free account with your Ontario college or university email address. Note:

- content you create can be private or publicly available
- you can search and adapt content created by other educators in Ontario
- files can be embedded or linked to in Blackboard and other web pages
- activities do not connect to Grade Centre

## Tips for using the tool

[Step-by-step tutorials](#) are available for each format type. You can also view past webinars from the Teaching & Learning Centre: [H5P Webinar](#). H5P is also covered in the *Designing Online Materials for Your Course* from the Teaching & Learning Centre; check [MyPD](#) for availability.

## Examples

Visit [this page for a showcase](#) of some H5Ps from Seneca.
